A5_Status

Status: Most aspect of the application that is supposed to be working is.
PetStoreSystema5q2.Java works when the user input is entered twice.
PetStoreSystema5q6.Java, sometimes user input for Animal is not allowed. (I think I have fixed it though, not sure).
The command number across Pet Store is not the same. It is either zero or one to quit, depends on the petsiore.java.

Hours Spent: I estimate it took me around a week to complete the assignment. The assignment was really long.
